

## WHAT IS NONI?

Noni is *the* new health craze; it's one of the hottest selling health supplements in America right now. Almost one bottle per second is sold in this country – and for good reason! That's because a wave of new scientific research verifies what the people of French Polynesia have known for thousands of years: that noni is one of the most powerful healers on the planet. Once people try it, they immediately feel its benefits. And, it's not a passing fad. Noni is the real article.

**BENEFITS OF NONI:** There are many very powerful, very real benefits of Noni. Here are just four:

- Immune Booster. Our immune system prevents illness and disease. However, most of our immune systems are compromised from environmental pollutants, less-than-ideal diets and stress and that puts us at greater risk of developing illness and disease. Noni is an effective immune booster, protecting you from illness and disease.
- Pain-killer. Noni is known as the “pain killer tree.” It's a natural analgesic. A study in France indicated Noni to be 75% as effective as morphine sulfate without addictive or toxic side effects.
- Anti-Inflammatory. New research shows that some of the most deadly ailments such as coronary artery disease are largely caused by inflammation. Noni is a proven anti-inflammatory on par with many over-the-counter NSAIDS.
- Adaptogen. We all are facing more and more stress each day and noni helps the body deal with stress naturally, rather than masking it with things such as caffeine. Noni is known as the “Premiere” Adaptogen, a substance that has a global balancing effect on all body systems – working on the cellular level to restore homeostasis and help damaged cells to function normally.

**NONI PACIFIC IS THE BEST:** These days, most health products put the promotion over the product and make wild claims and promises they simply cannot keep. Noni Pacific is the first certified organic, 100% pure Noni juice, grown in lava rich soils and aged according to ancient traditions with the leaves infused for added potency; a truly unique supplement essential for maintaining healthy immune function and the best possible quality of life. Noni Pacific has everything you need, and nothing you don't.
